

Michael N. Gatewood

Software Engineer

Dedicated, results-driven engineer with expertise in front-end and back-end development. An analytical problem-solver with an emphasis on quality and a can-do attitude. Known for accomplishing goals in a fast-paced, deadline-driven environment.

Experience

Software Development Technical Lead

August 2019 – October 2022

Coin Cloud, Inc.

Las Vegas, Nevada

Designed and implemented software solutions that integrated across multiple applications within a complex technology stack. Managed a team of developers to deliver quality products on time and within scope. Worked closely with a cross-functional Product team to assess project feasibility, define technical specifications, and establish project timelines and milestones.

Human Resources Manager

March 2008 – November 2017

United States Army

Fort Carson, Colorado

Trained, supervised, and mentored staff in oversight and management of postal operations and personnel accountability for the entire U.S. Central Command at Camp Arifjan, Kuwait. Provided direction and support to subordinate postal and accountability teams of more than 300 personnel and reported daily status to Brigade and Theater command staff.

Technical Consultant (Volunteer)

February 2012 – December 2015

Saint Therese Center

Henderson, Nevada

Developed a responsive e-commerce website for marketing campaigns and processing donations. Established, installed, and maintained an organizational standard for software, hardware, and telephony, including a corporate network and server. Installed and monitored a security camera system. Provided desktop support to staff and volunteers.

Education

Front-End and Back-End Engineering

November 2017 – February 2019

Turing School of Software and Design

Denver, Colorado

Applied fundamental software engineering principles and best practices in an intense course of study spanning more than fourteen months. First student ever to be inducted into the '14er' club by graduating from both Front-End and Back-End Engineering programs.

Technical Skills

TypeScript | JavaScript | React | Next | Svelte | Meteor | Angular
