

Michael N. Gatewood

Software Engineer

Dedicated, results-driven engineer with expertise in front-end and back-end development. An analytical problem-solver with an emphasis on quality and a can-do attitude. Known for accomplishing goals in a fast-paced, deadline-driven environment.

Experience

Coin Cloud, Inc.

Las Vegas, Nevada

Software Development Technical Lead

March 2022 – October 2022

Designed and implemented software solutions that integrated across multiple applications within a complex technology stack, including Angular, AWS, Serverless, MongoDB and Docker. Led a team of developers to deliver quality products on time and within scope and collaborated closely with a cross-functional Product team to assess project feasibility, define technical specifications and establish project timelines and milestones that drove business success.

Software Development Manager

June 2020 – March 2022

Led a team of 5-8 software engineers, providing technical leadership and guidance to ensure successful project execution and delivery of high-quality software solutions that met business objectives and increased customer satisfaction. Coordinated with stakeholders to define project requirements, developed and managed project plans and ensured timely delivery of high-quality software solutions that drove business growth and customer engagement.

Senior Software Engineer

February 2020 – June 2020

Championed the development of complex software projects, providing technical guidance and oversight to junior engineers and collaborating with cross-functional teams to drive project success. Leveraged expertise in software design, development and testing to deliver high-quality solutions that met business objectives and exceeded customer expectations.

Junior Full Stack Engineer

August 2019 – February 2020

Boosted company productivity by designing and deploying custom features for in-house enterprise software, leveraging Meteor, MongoDB, CoffeeScript and Jade/Pug. Crafted sophisticated data aggregations to ensure seamless performance and scalability and designed intuitive, reactive interfaces that transformed the user experience and empowered users to excel in their roles.

United States Army

Fort Carson, Colorado

Human Resources Manager

March 2008 – November 2017

Trained, supervised and mentored staff in oversight and management of postal operations and personnel accountability for the entire U.S. Central Command at Camp Arifjan, Kuwait. Provided direction and support to subordinate postal and accountability teams of more than 300 personnel and reported daily status to Brigade and Theater command staff.

Education

Turing School of Software and Design

Denver, Colorado

Front-End Engineering

November 2017 – August 2018

Back-End Engineering

August 2018 – February 2019

Applied fundamental software engineering principles and best practices in an intense course of study spanning more than fourteen months. First student ever to be inducted into the '14er' club by graduating from both Front-End and Back-End Engineering programs.

Technical Skills

Fluent: JavaScript, React, Next, Svelte, Meteor, MongoDB, Git, GitHub

Proficient: TypeScript, Node, Express, Mocha, Chai, Ruby on Rails, Sinatra, Postman, PostgreSQL, MySQL, Playwright, Jira, Confluence

Familiar: Angular, SQL, GraphQL, Docker, AWS, Knex, Firebase, Jest
